Toffee sauce

On our journey to net zero, we have teamed up with Foodsteps to analyse the environmental impact of our menus. The carbon labels display the carbon footprint per serving of each item, which refers to the greenhouse gas emissions released from farm to waste.

Food allergen, intolerance and sensitivity information is compiled using data obtained from our approved suppliers. As with every catering establishment there is always a potential for cross-contamination to occur. While we endeavor to prevent this as far as possible, the nature of an allergen means we cannot fully guarantee that cross-contamination may not have occurred. If you have any concerns please speak to a member of staff.
